

North Korea - a slideshow

Samstag, 14. April 2012

Just in time for North Korea's missile launch i like to share some impressions of this country. North Korea often discribed as a totalitarian Stalinist dictatorship with an elaborate cult of personality around the Kim family and one of the lowest-ranking human rights records of any country. The government denies this. In fact the DPRK is the most isolated country of the world and it is not easy to travel arround and even taking some good pictures.
